

Fixed Installation Instruction of GE-007

It can be installed inside another electrical appliance or directly to AC power source. If inside another appliance, ample space must be available to house GE-007 and the charger.

1. Turn off power, or disconnect any AC power source
2. Connect the RED wire to the L wire of the AC power line
3. Connect the BLUE wire to the N wire of the AC charger
4. Completely seal the connecting point of the 2 wires with electrical tape to prevent faulty electrical accident
5. Plug the charger into GE-007 charging socket, turn on AC power source
6. LED comes on RED indicating charging; if LED does not come on, check the wire connections, or repeat steps 1 – 5.
7. Turn on GE-007 after inserting the SIM card, wait 2 minutes, make a test call to the number on the SIM, GE-007 should now work as normal.
